

OMELAS

Shop with confidence

Project Name: *Omelas*

Project Slogan: Shop with confidence

Project Theme: Online Shopping

Team Members:

Khojiakbar Shamsutdinov	U1610107
Latofatkhon Saydamatova	U1610123
Lobar Fayzullaeva	U1610126
Mirfayoz Yuldoshev	U1610141

Github repository: <https://github.com/iuthub/design-project-omelas.git>

Host name: omelas.tk

As it is said in requirements we did our Online store in given requirements:

For Front-End we use Bootstrap mainly, jQuery, JavaScript, CSS and HTML

For Back-End we use Laravel, Laracast and Stripe.js

Distribution:

Khojiakbar Shamsutdinov: Back-End developer (Laravel): Made Database connection with Online store, Database integration, Integrating Front-end with Laravel. Admin Panel Back-End(adding products).

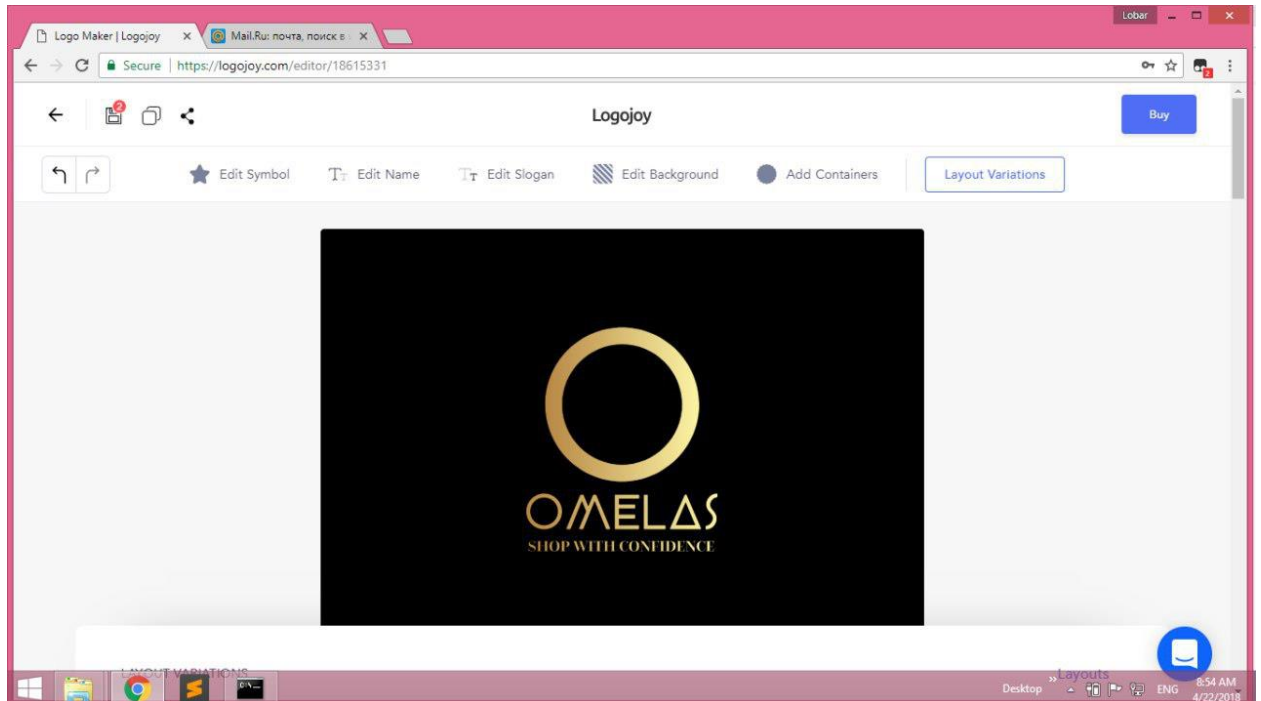

Latofatkhon Saydamatova: Front- End developer(Bootstrap, jQuery and JS for front) (product, card and account pages). About us page created. Made Navbar front (Men's, Women's, New Arrivals and etc.) Back-End: (Laravel). Write API to get products from Database in JSON format, Input Validation Server side, Admin panel Back-End(removing products)

Lobar Fayzullaeva: Front-End developer(Bootstrap, jQuery and JS for front). Shipping page created. Made admin panel front for online shopping, Made Responsive pages. Input Validation Client side. Integration front-end of What's new, Men's with database in laravel. Detecting latest uploaded items.

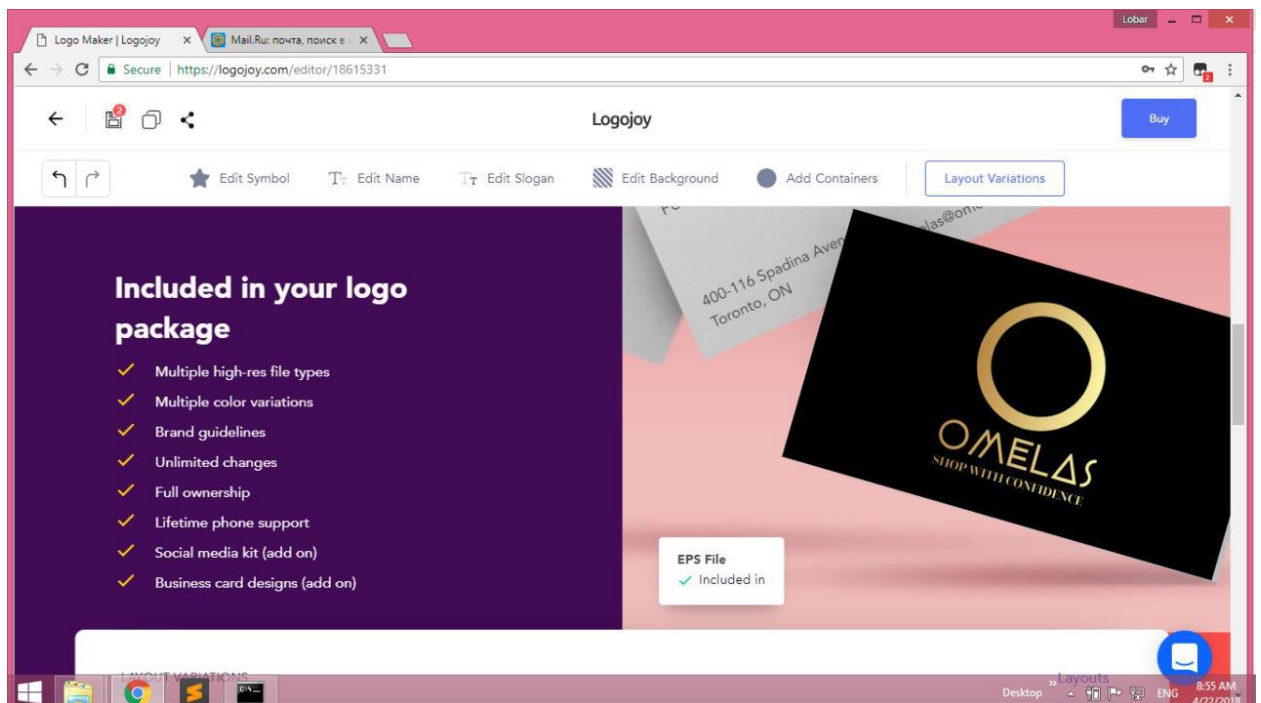

Mirfayoz Yuldashev: (Bootstrap, jQuery and JS for front). Login page and Registration Back-end. And front –end, Delivery information page. Integration front-end of Women's page with database in laravel.

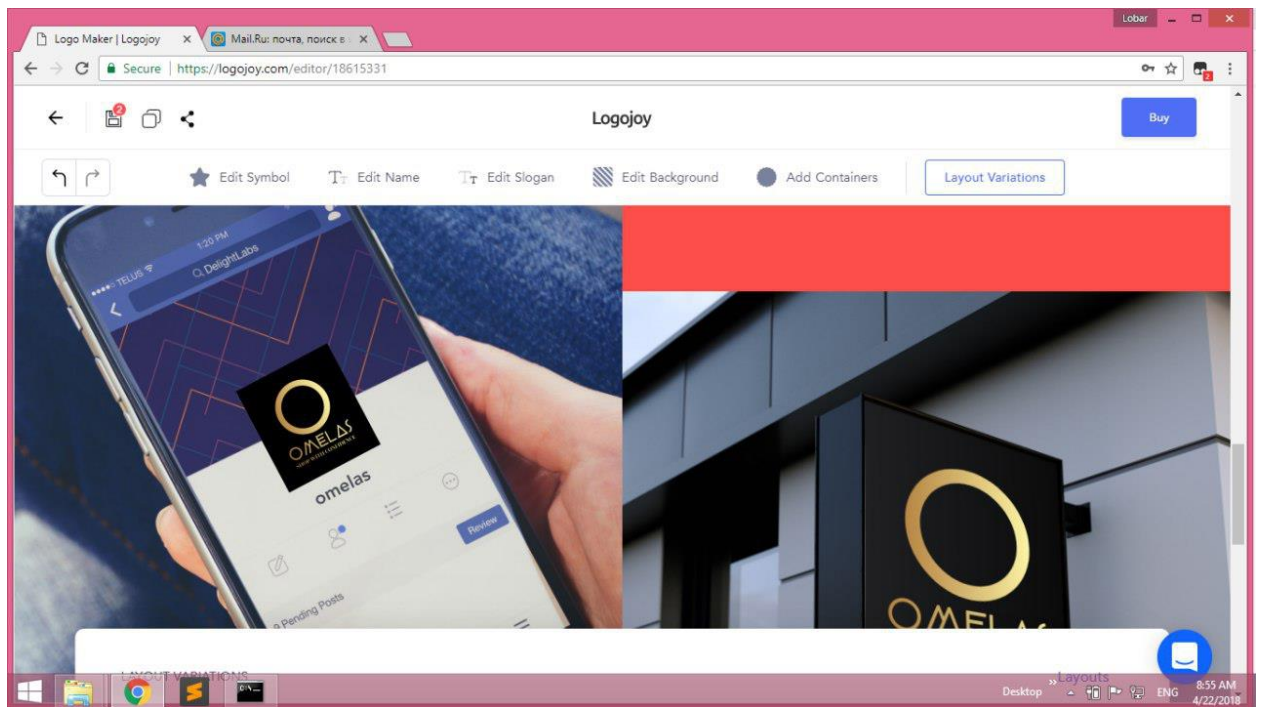

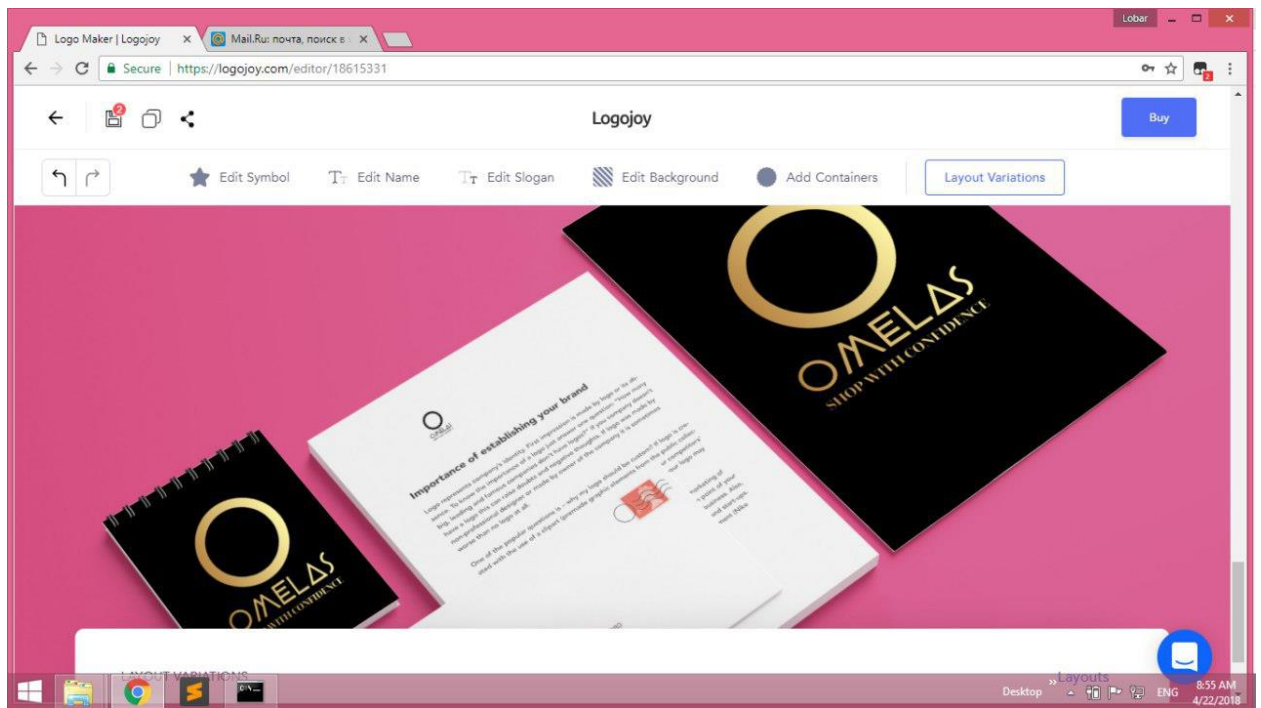

First We begin our work with choosing a LOGO from <https://logojoy.com/editor/18615331>

We create our own brand:

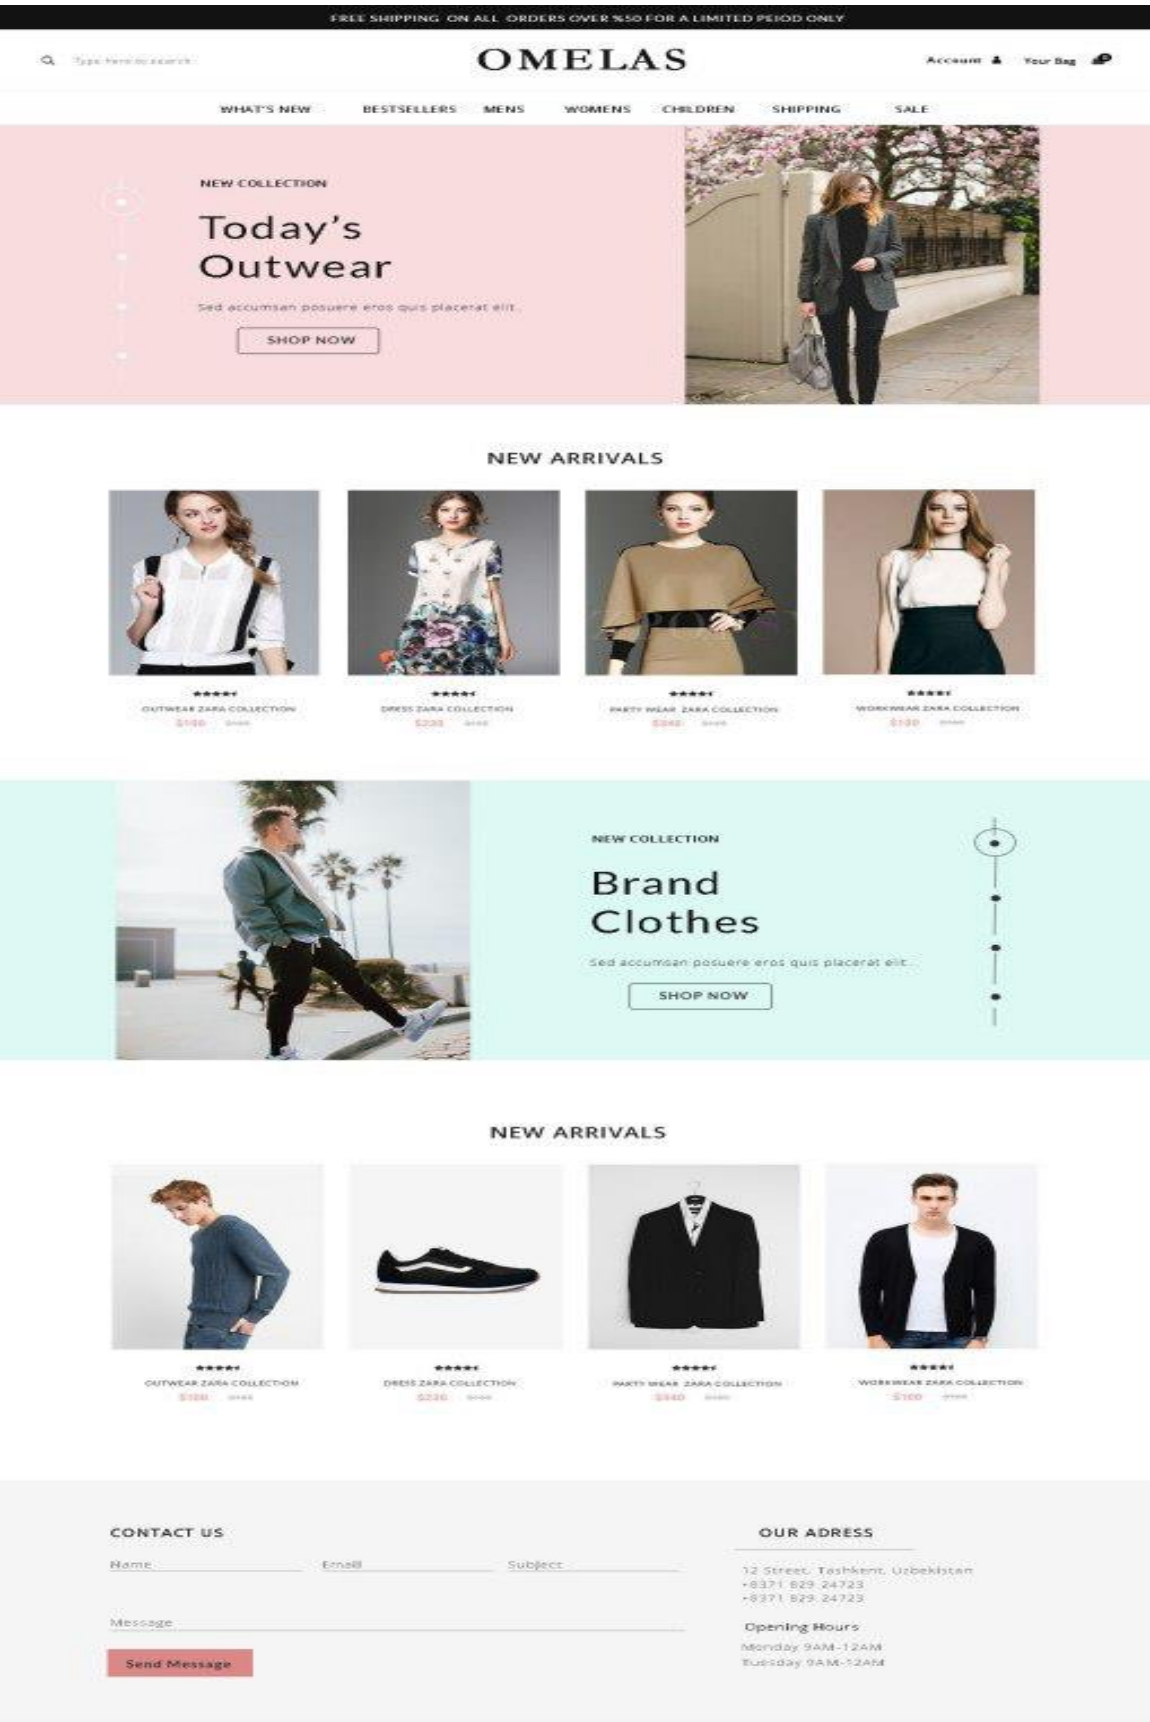

Here you can see it created products with our LOGO:

In order to make Online shopping we begin our work with designing. We make a prototype using PHOTOSHOP. This help us in writing Front-End of our site. So, let's look at our design:

After that we distribute our works and began to do the project:

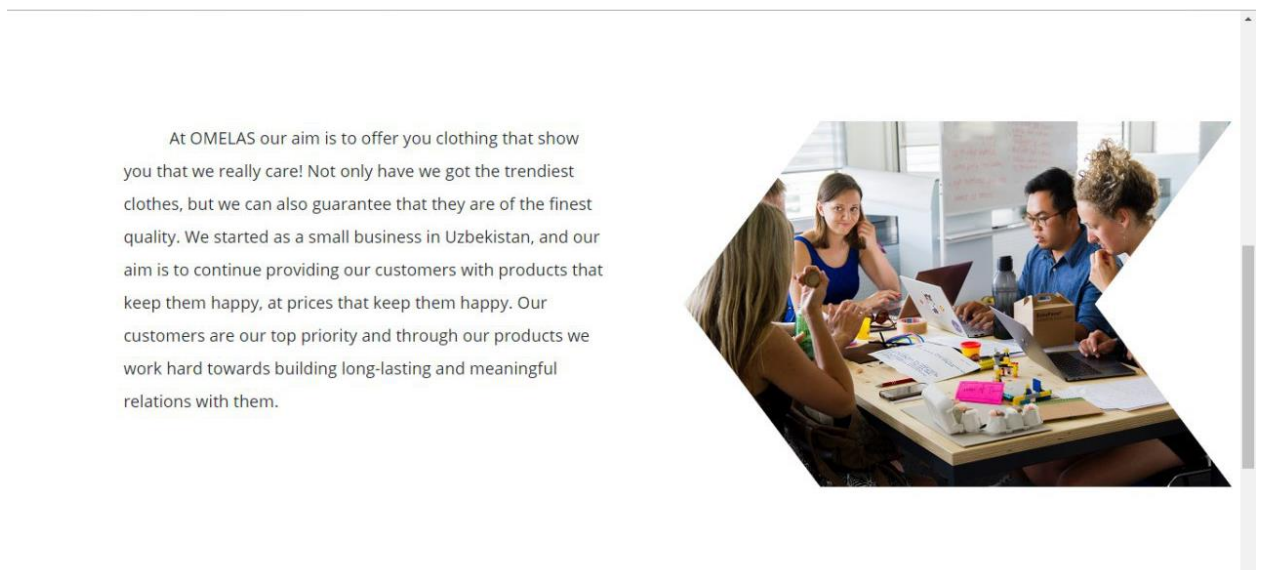

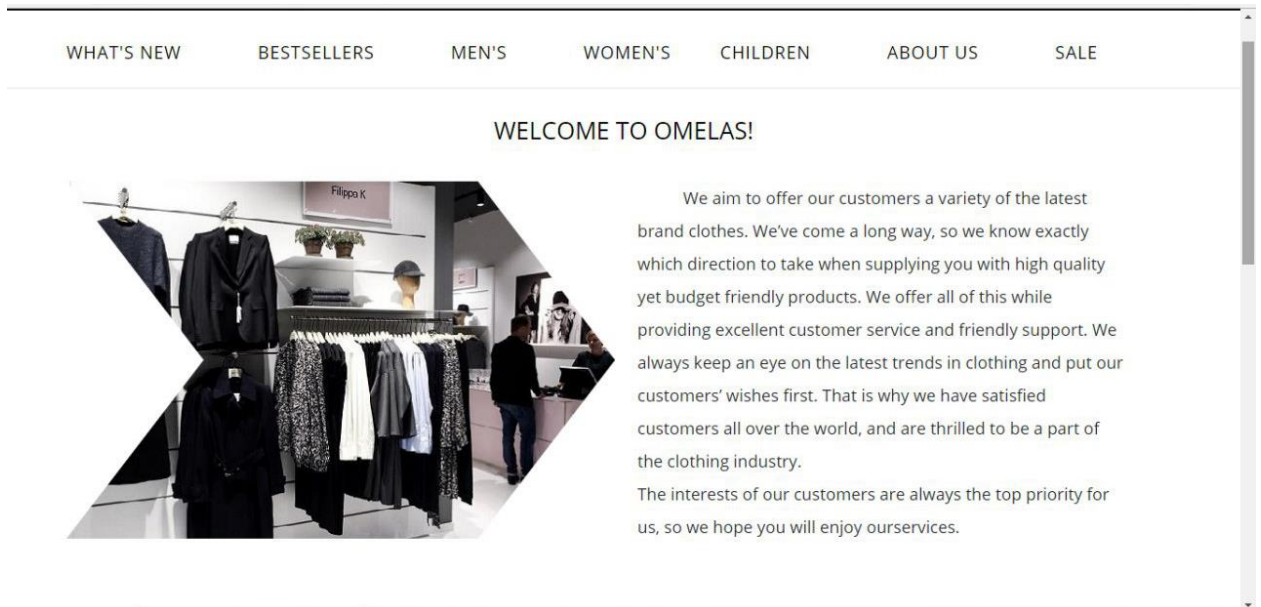

Latofatkhon Saydamatova and Lobar Fayzullaeva did Front-End:

CONTENT:

Company Landing Page:

This contains short information about the company along with its logo and some relevant photos:

work hard towards building long-lasting and meaningful relations with them.

SHIPPING POLICY

Thank you for visiting and shopping at OMELAS. Following are the terms and conditions that constitute our Shipping Policy.

Domestic Shipping Policy Shipment processing time

All orders are processed within 2-3 business days. Orders are not shipped or delivered on weekends or holidays. If we are experiencing a high volume of orders, shipments may be delayed by a few days. Please allow additional days in transit for delivery. If there will be a significant delay in shipment of your order, we will contact you via email or telephone. Update this section if your processing time exceeds 2-3 business days. Shipping charges for your order will be calculated and displayed at checkout.

At OMELAS our aim is to offer you clothing that show you that

can also guarantee that they are of the finest quality. We started as a small business in Uzbekistan, and our aim is to continue providing our customers with products that keep them happy, at prices that keep them happy. Our customers are our top priority and through our products we work hard towards building long-lasting and meaningful relations with them.

Registration: Using Bootstrap and jQuery properties we made Registration panel:

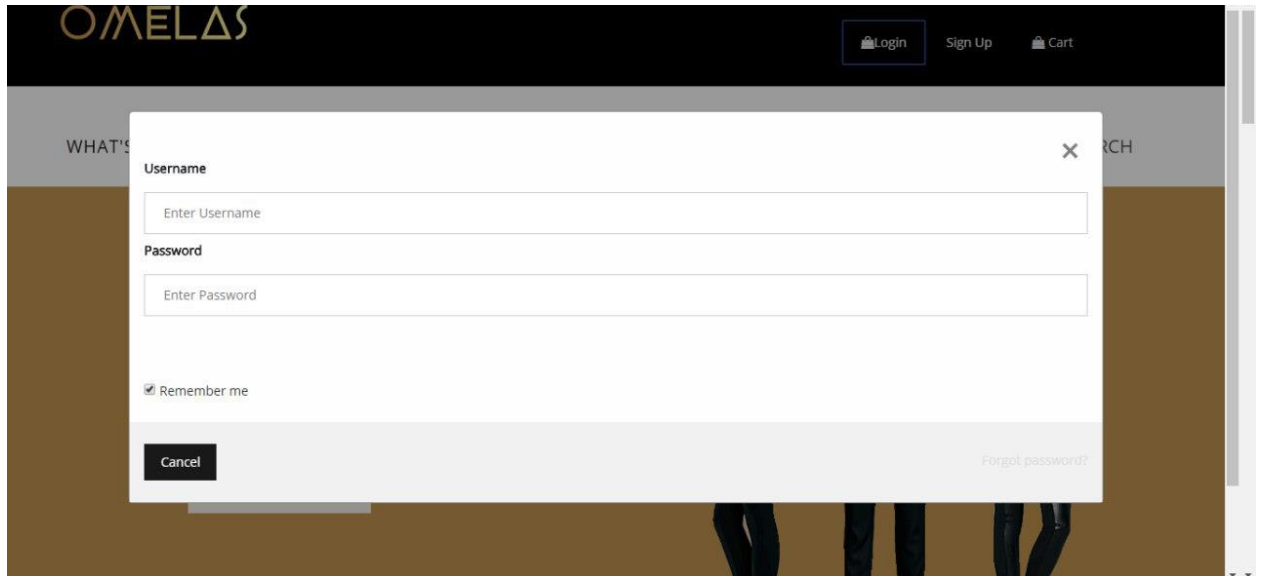

Also we made input validation:

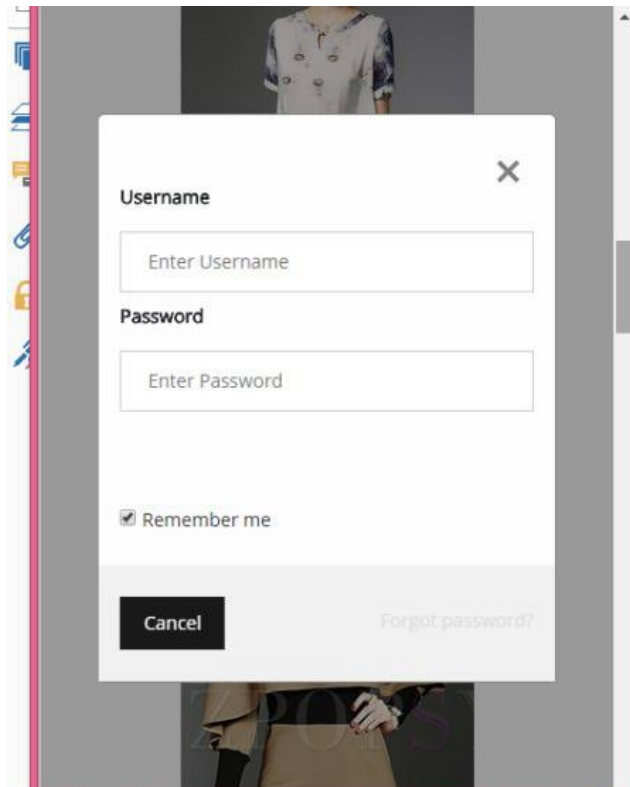

Here you can see that our page is responsive. This done by Bootstrap and it had animation of that displays by transition. Using jQuery first we hided sign-up page then after pressing login link display fnc turned on:

Sign in: Using HTML, CSS, Bootstrap and jQuery properties, we made Sign-in.

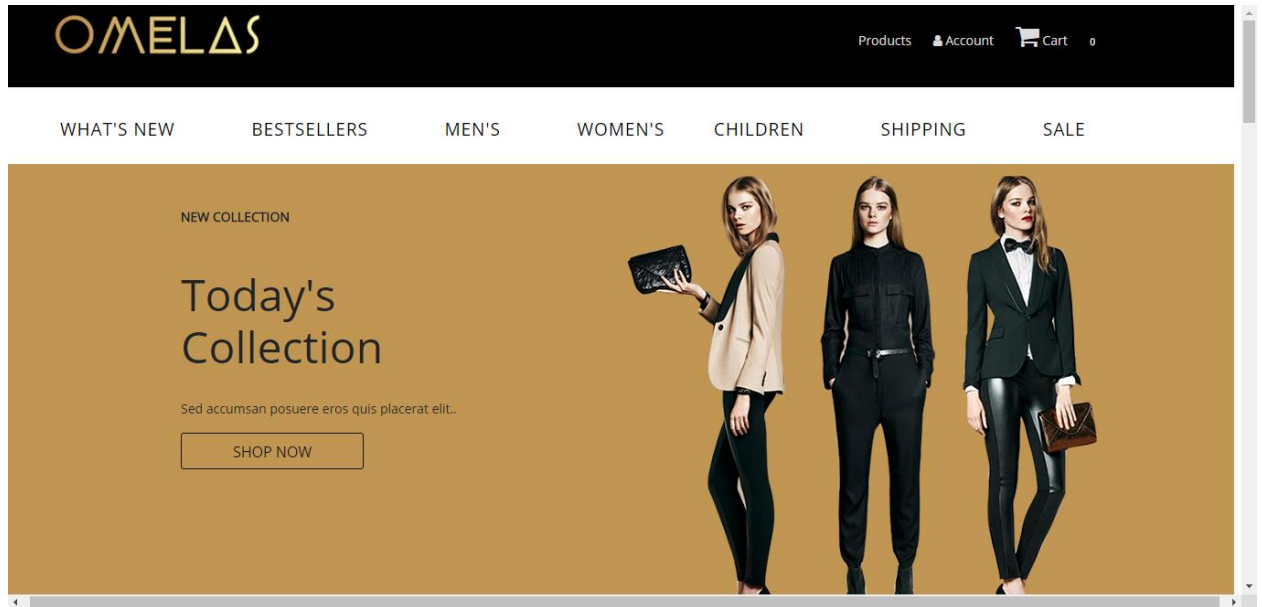

As you can see using Bootstrap features we make our site and sign-in responsive:

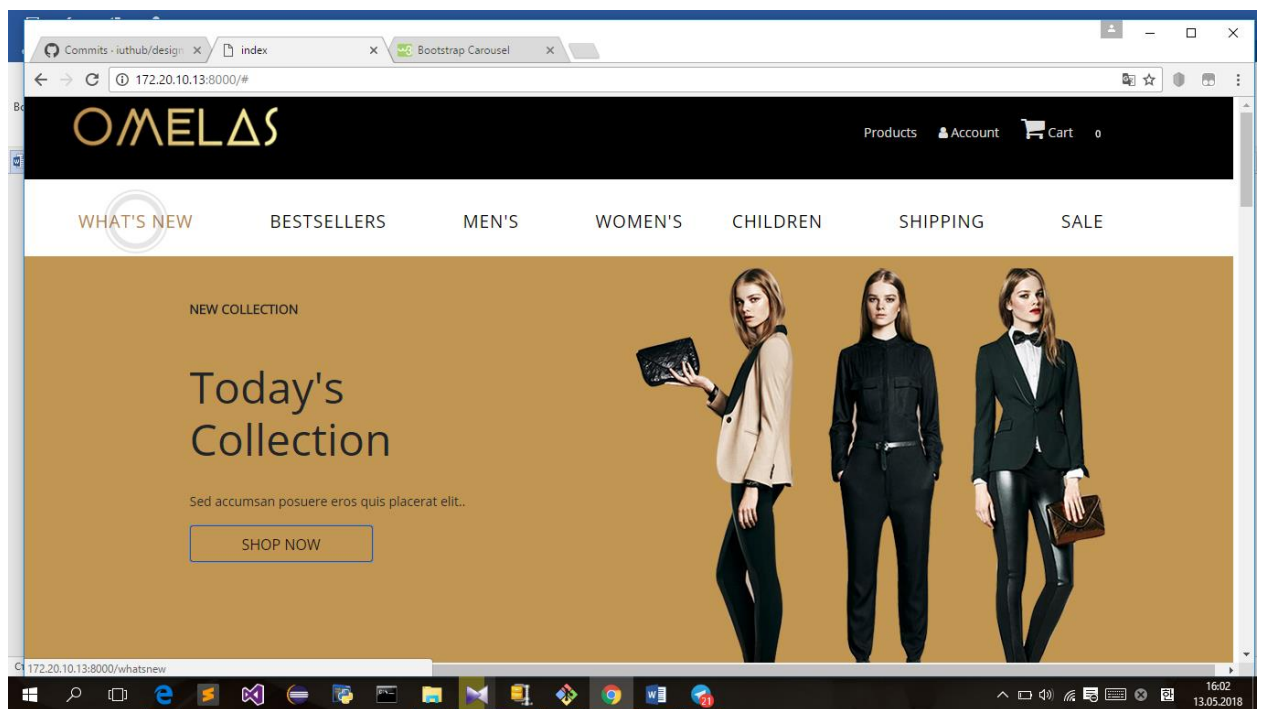

So, our main aim from this project: Online store – customers can buy goods online by adding items to their shopping cart and checkout at the end.

- 1) Easy to register
- 2) Easy to login
- 3) Client can buy a product
- 4) Client can order, add to wish list

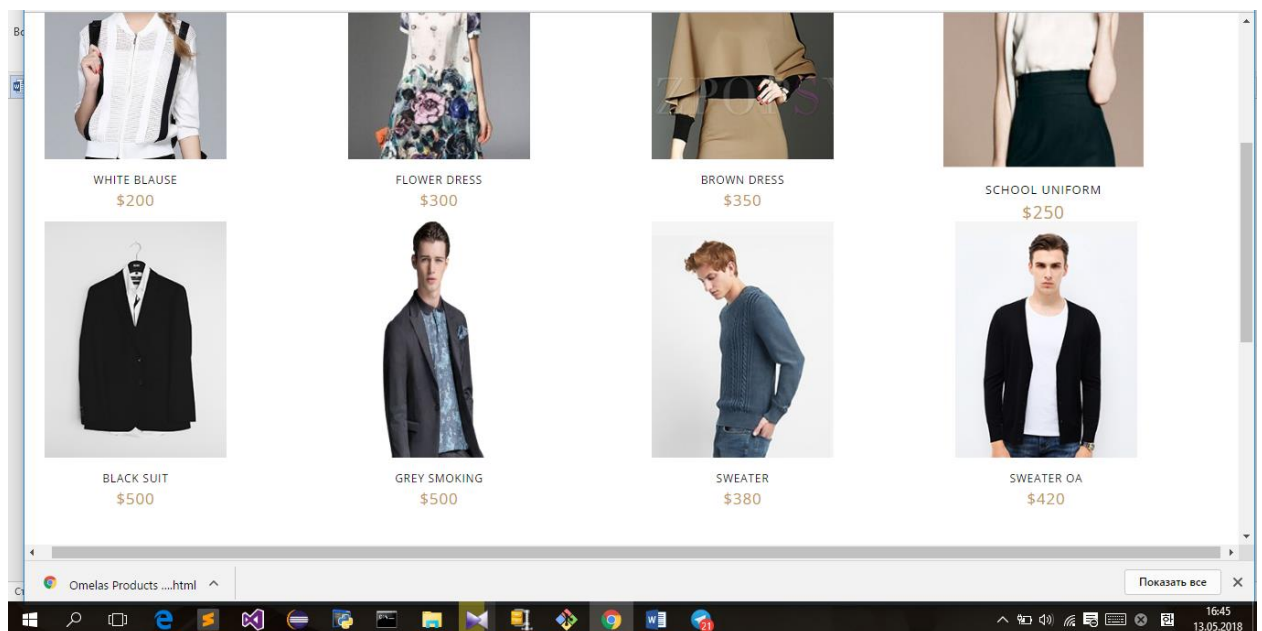

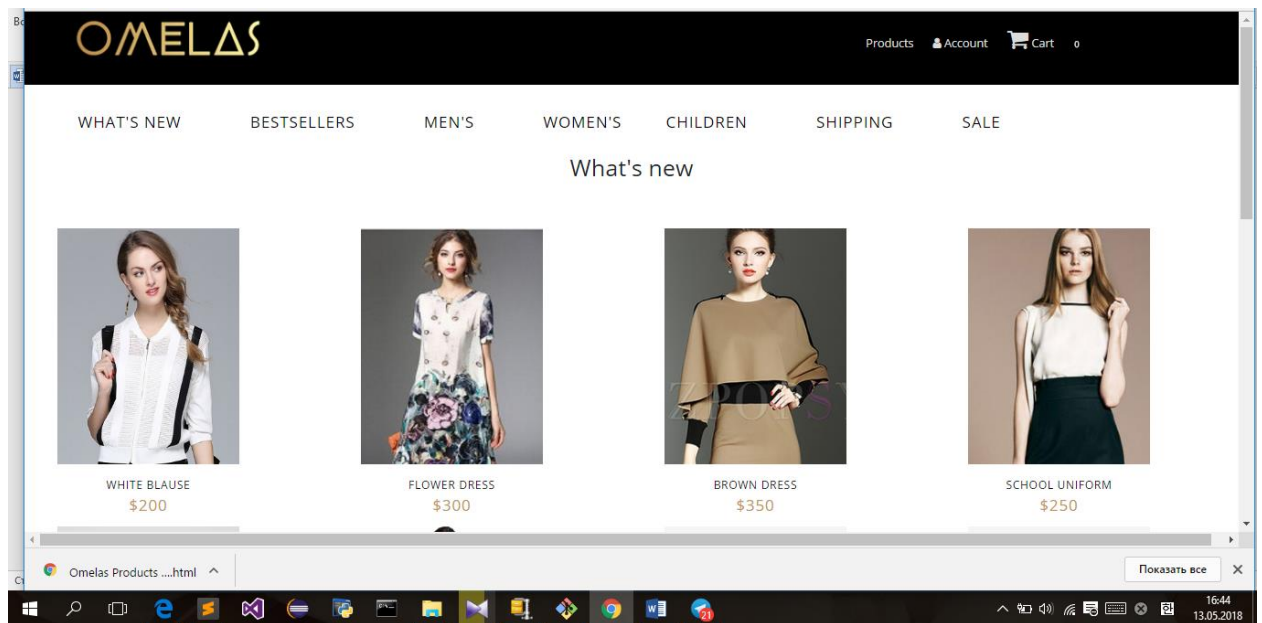

Let's see how our project works:

This is how our first page looks

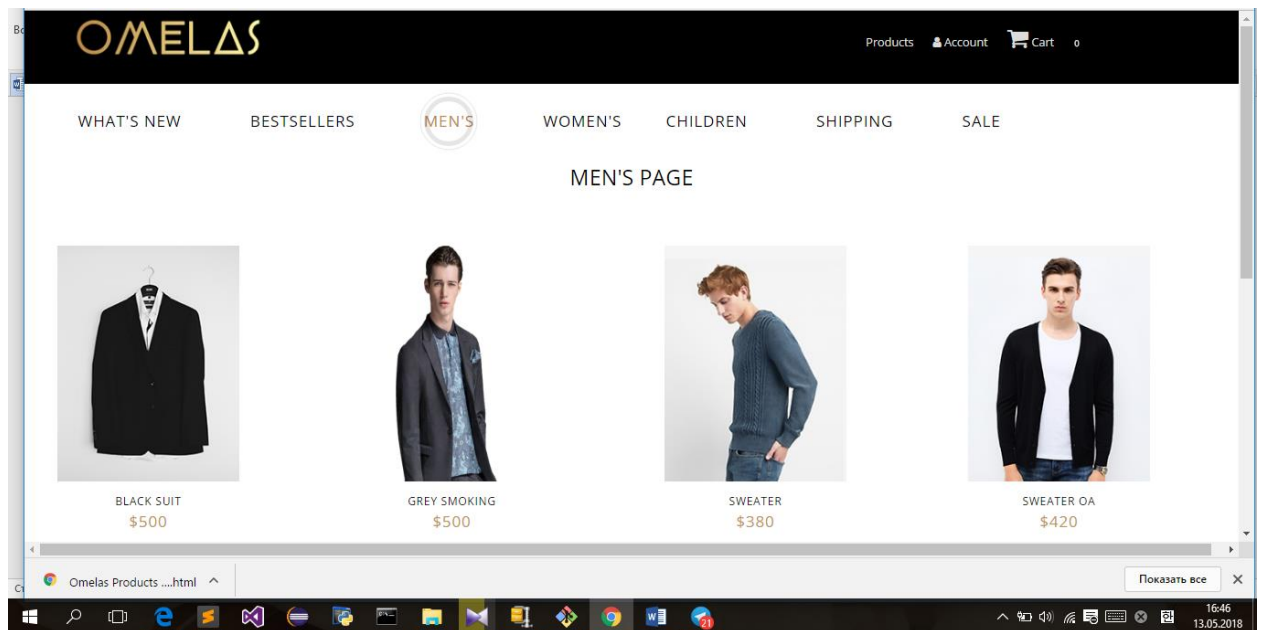

If you press what's new you can see recently added products: This is done by Laravel

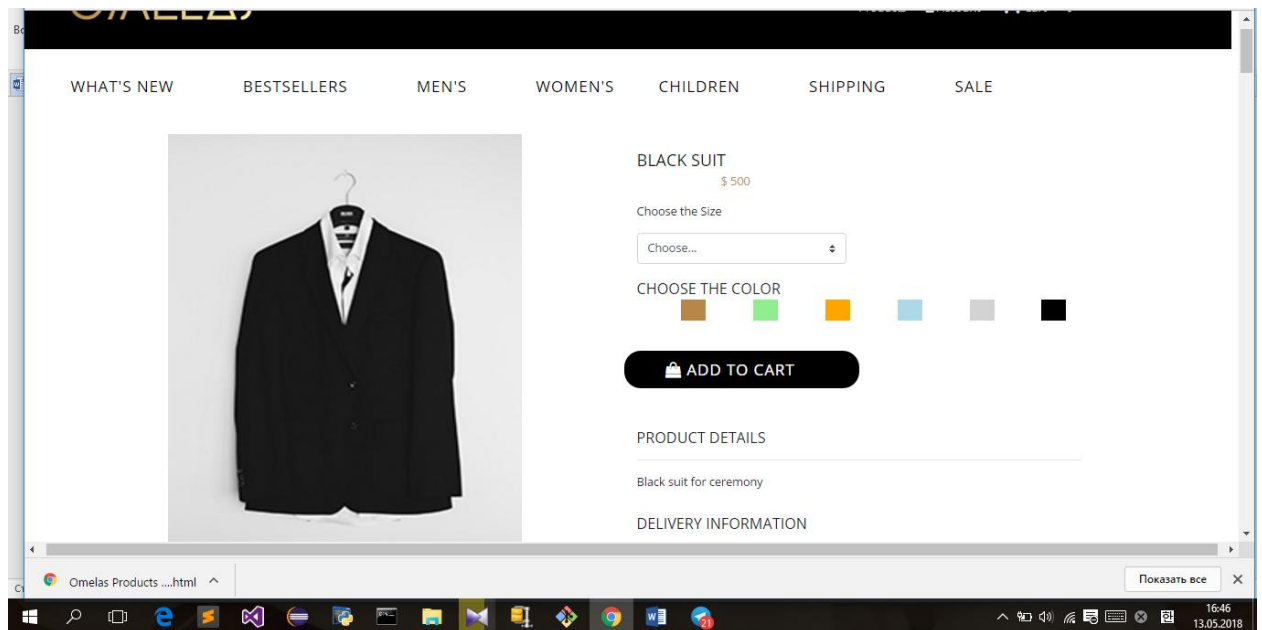

From both categories men's and women's

Now we have men's category:

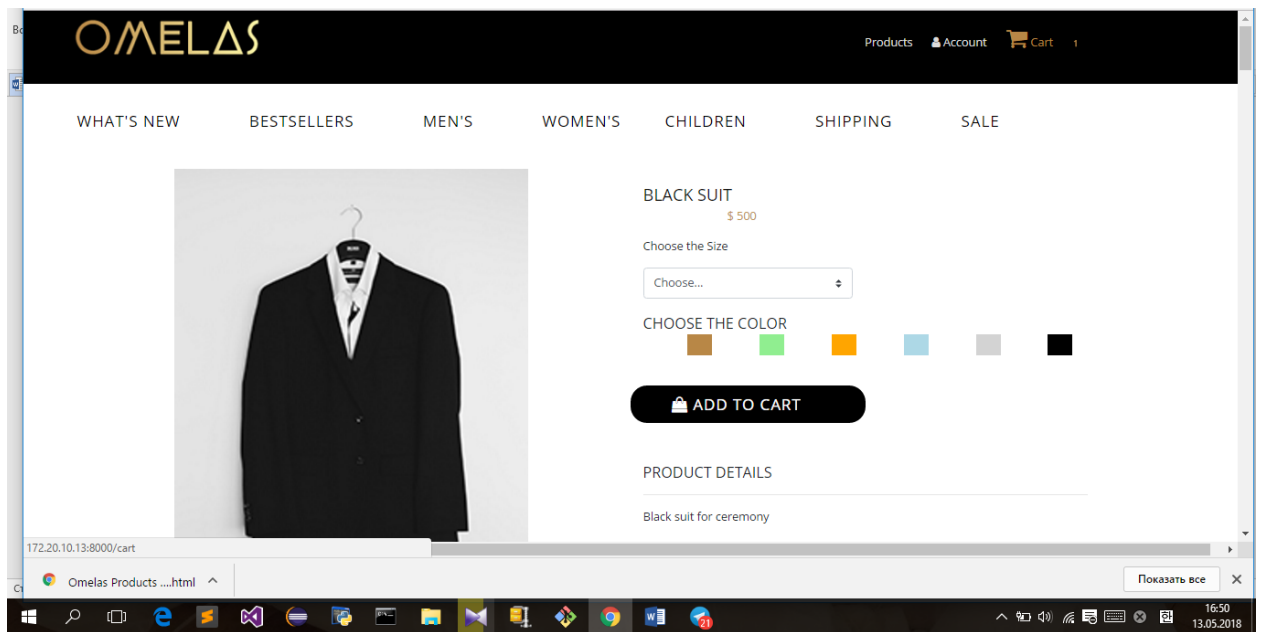

If we choose the product next page will be open:

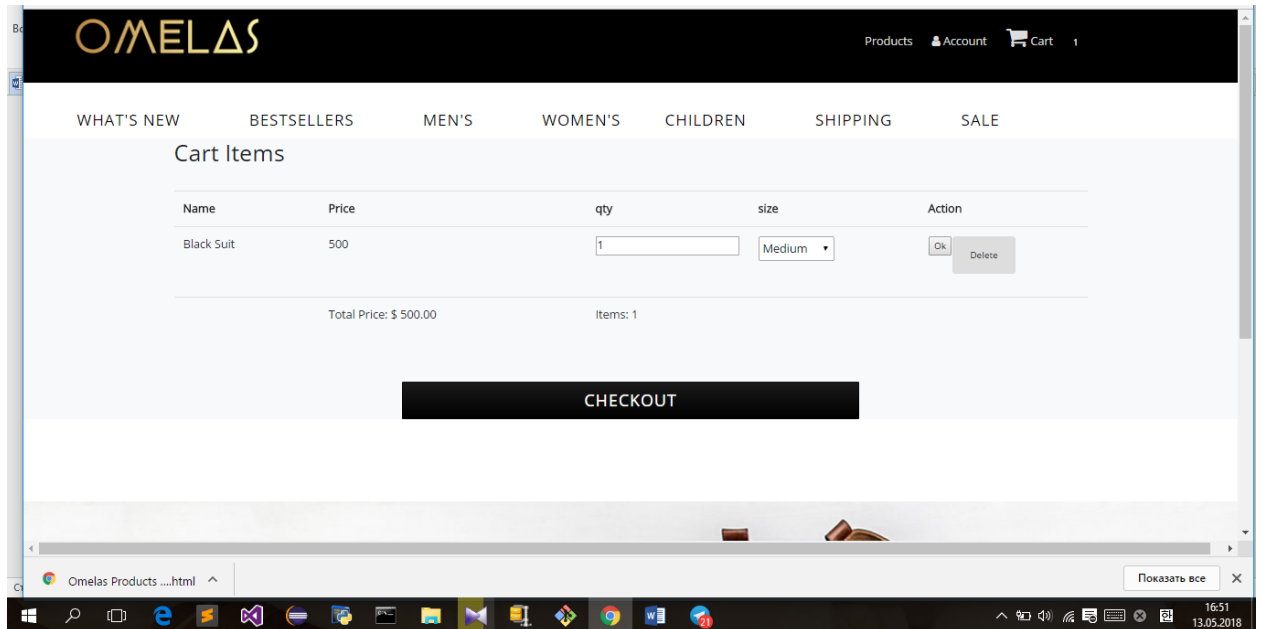

Here you can see product description and we can choose the size and color then add to card

If we add to card:

We can see that it is added:

If we press the checkout button we can fill up in order to buy a product:

The screenshot shows a web browser window with a checkout form. The form is titled "Shipping Info" and contains several input fields for shipping details. At the bottom of the form is a "Proceed to Payment" button. The browser's address bar shows "Omelas Productshtml". The Windows taskbar is visible at the bottom of the screen, showing various application icons and the system clock indicating 16:51 on 13.05.2018.

Then we can see:

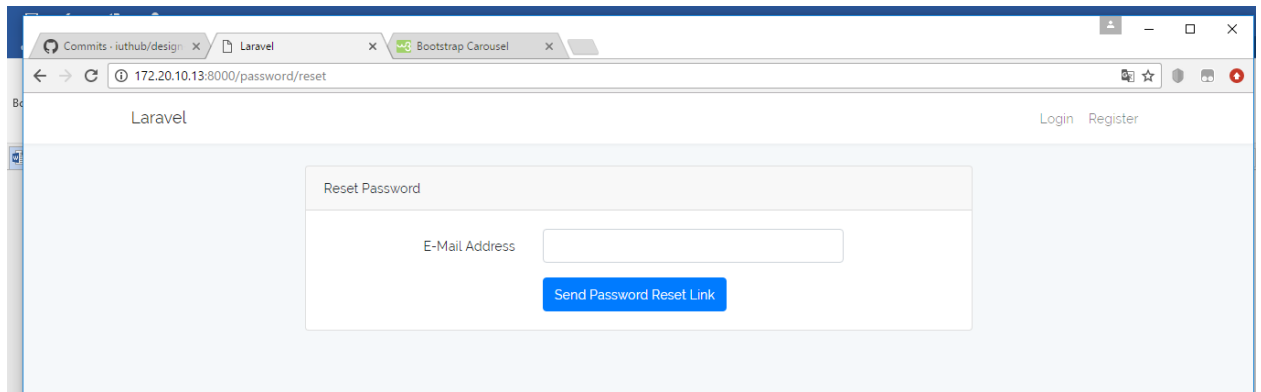

Admin Panel:

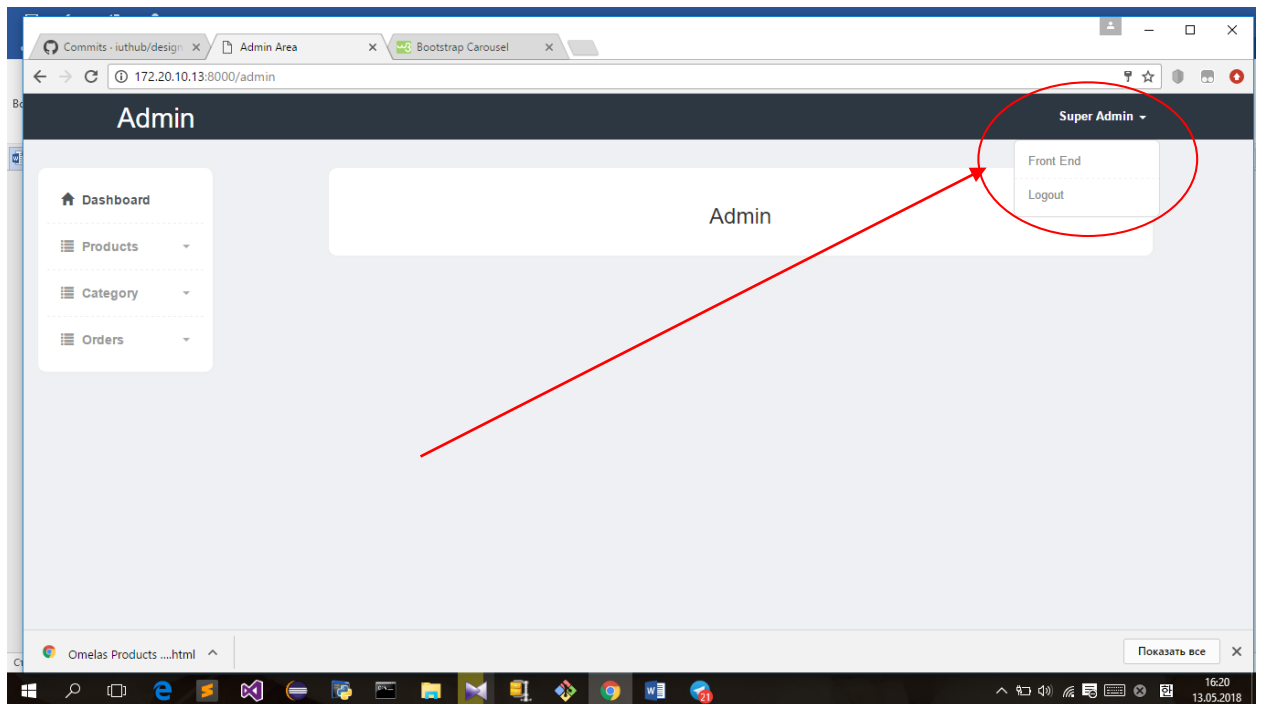

Here you can see that we can register and then login to admin panel:

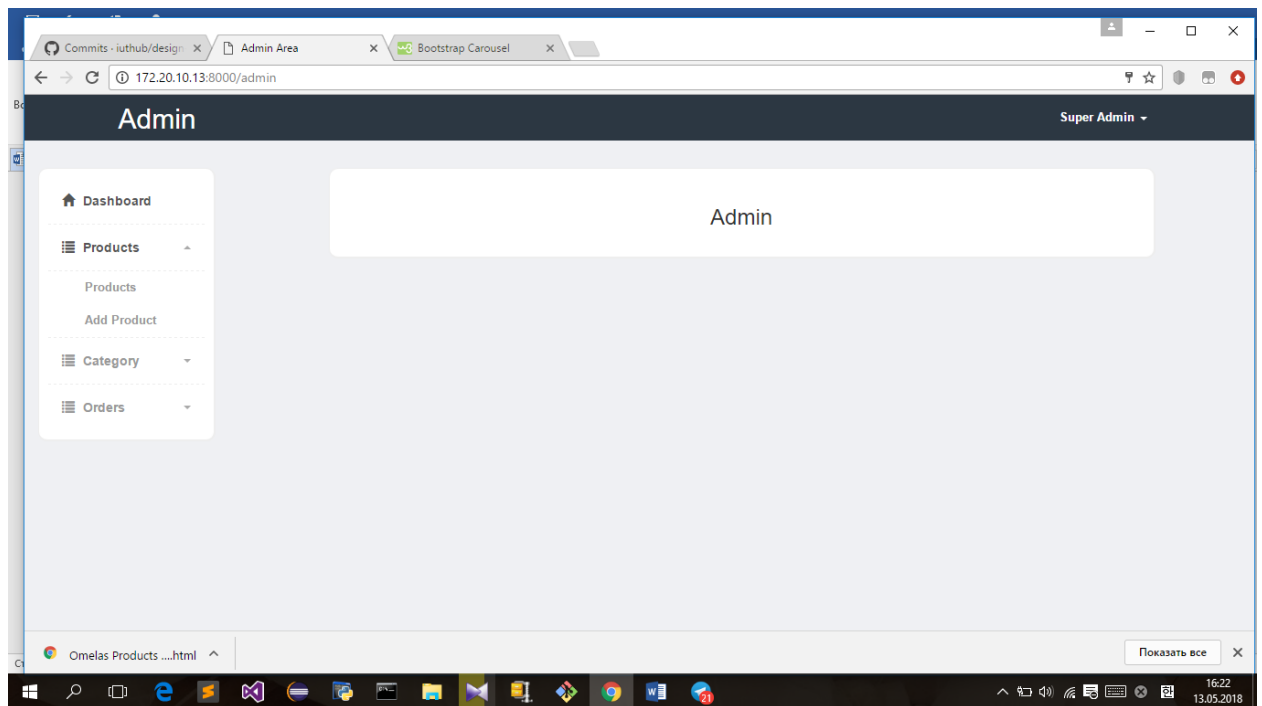

Here you can see that it has Input validations:

If you forgot your password it ask you to write your mail in order to response your password

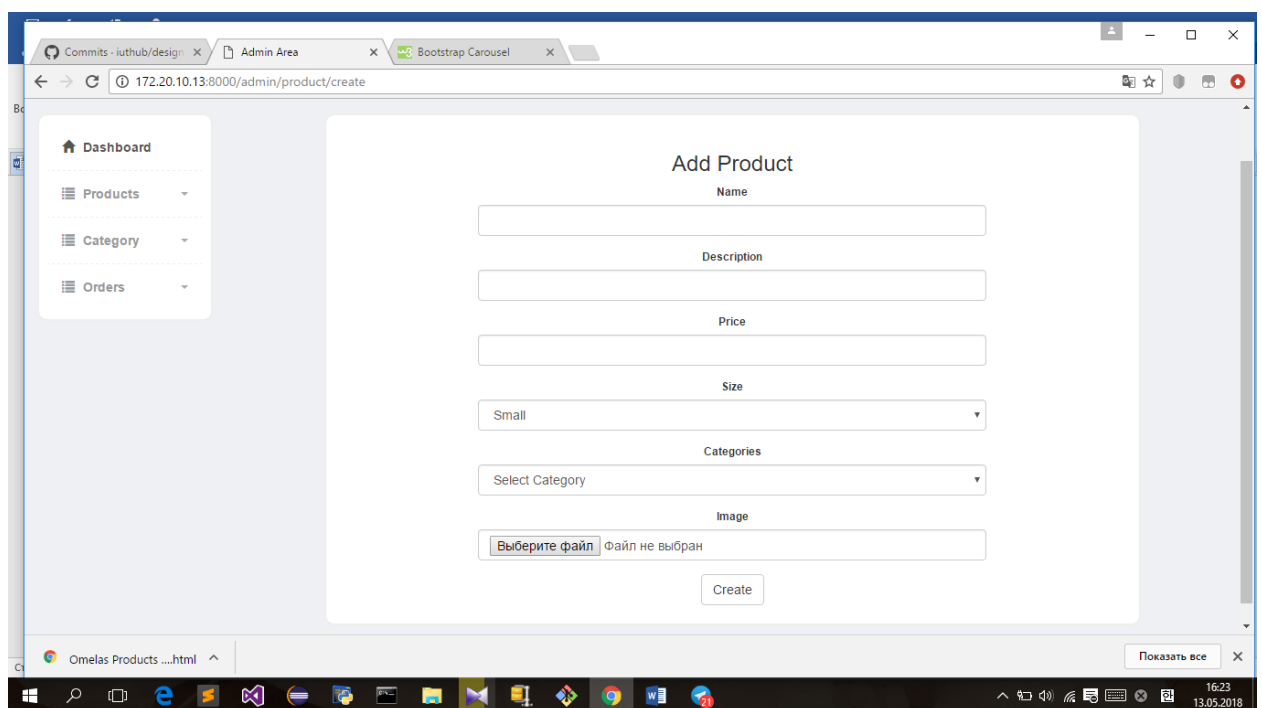

Here you can see our admin panel. It can switch into to modes: front-end and admin

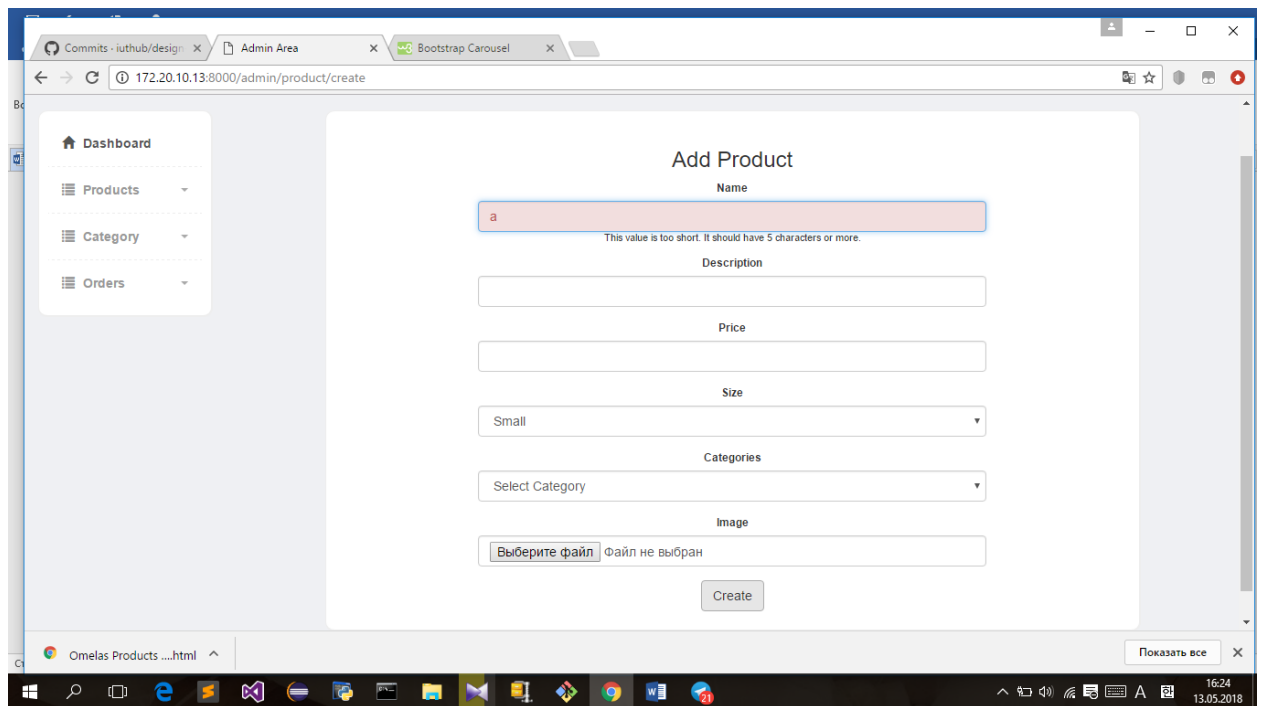

I should mention that admin panel written from scratch we didn't use ready Laravel admin panel

If you press products you can see all your products and add products:

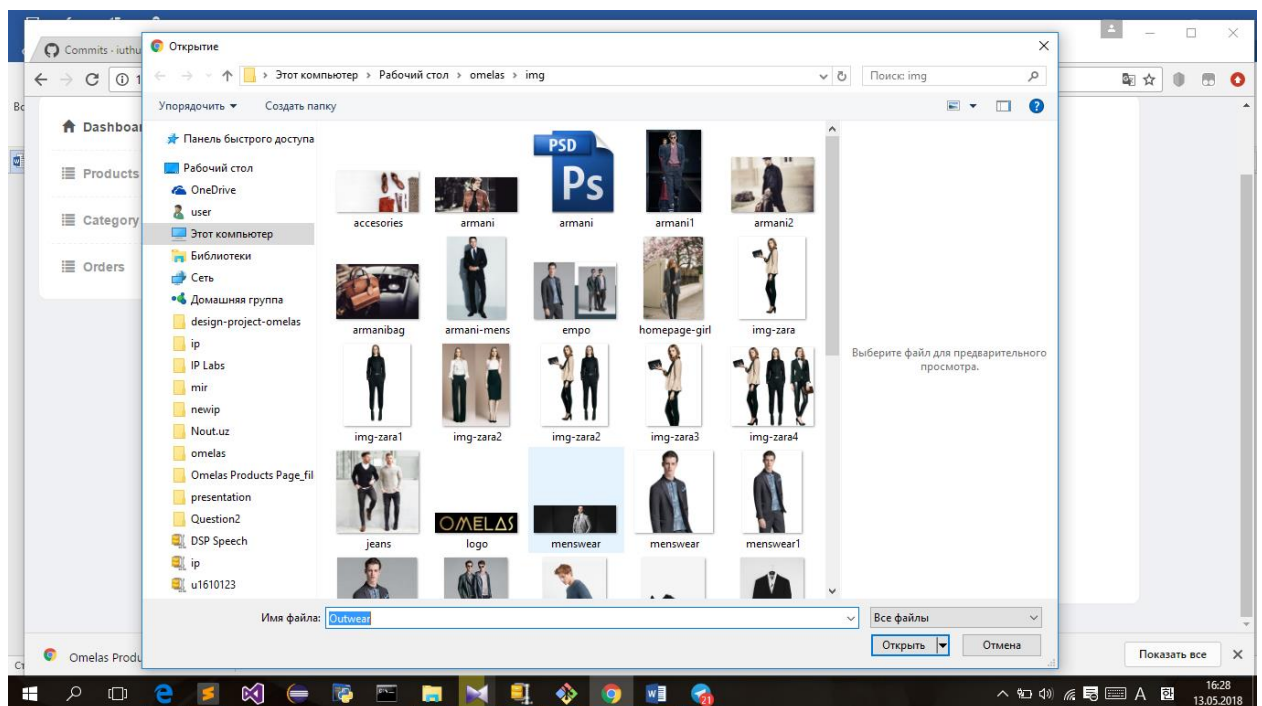

Here fill all blanks than

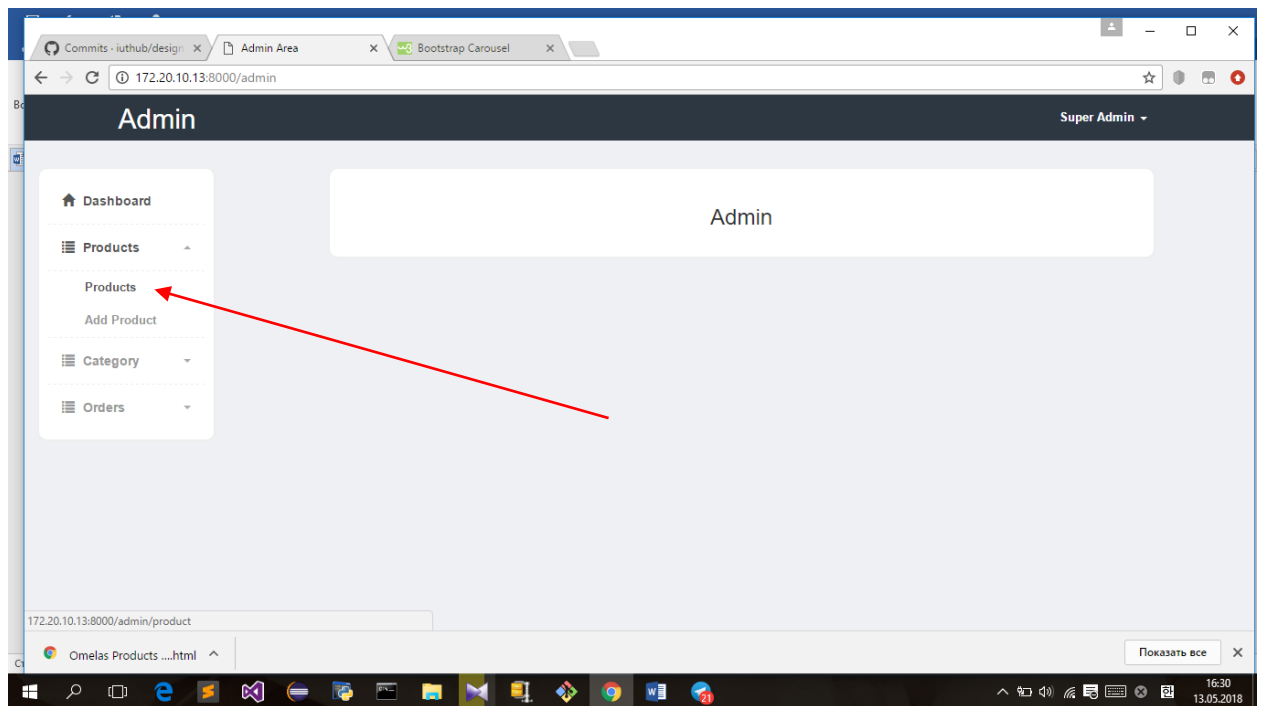

Here you can see it has also input validation:

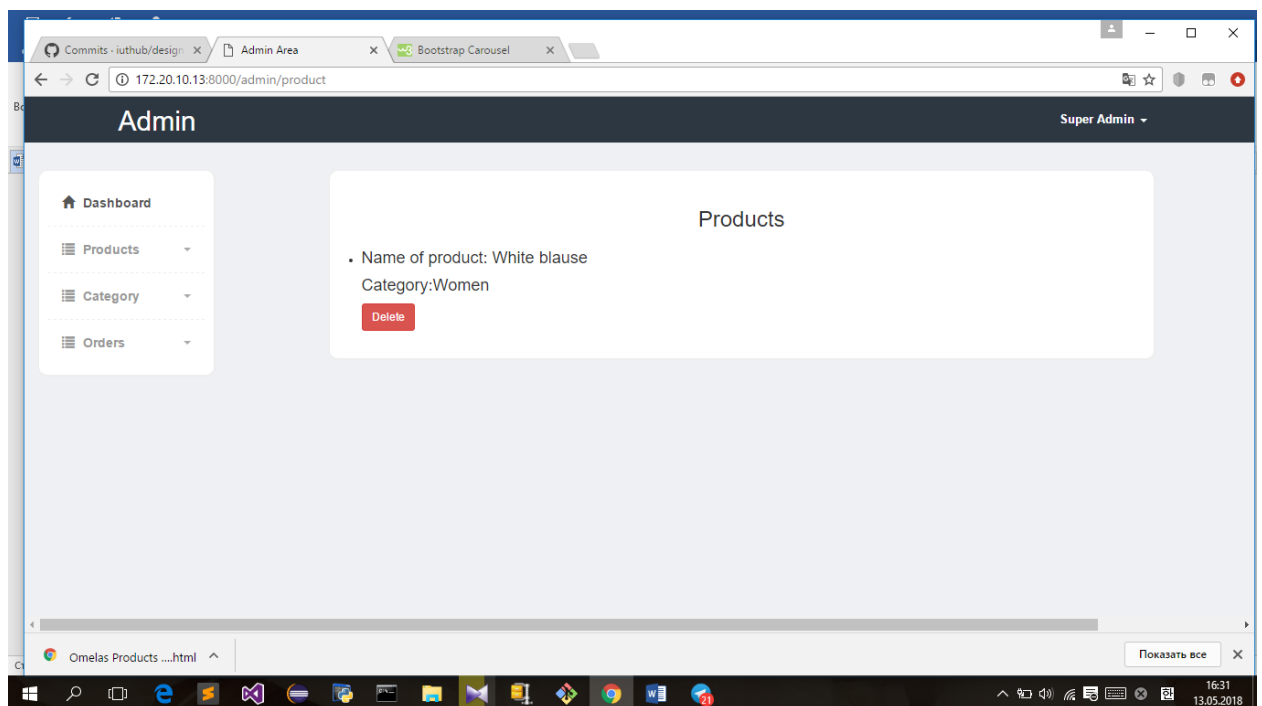

So fill all then press button create:

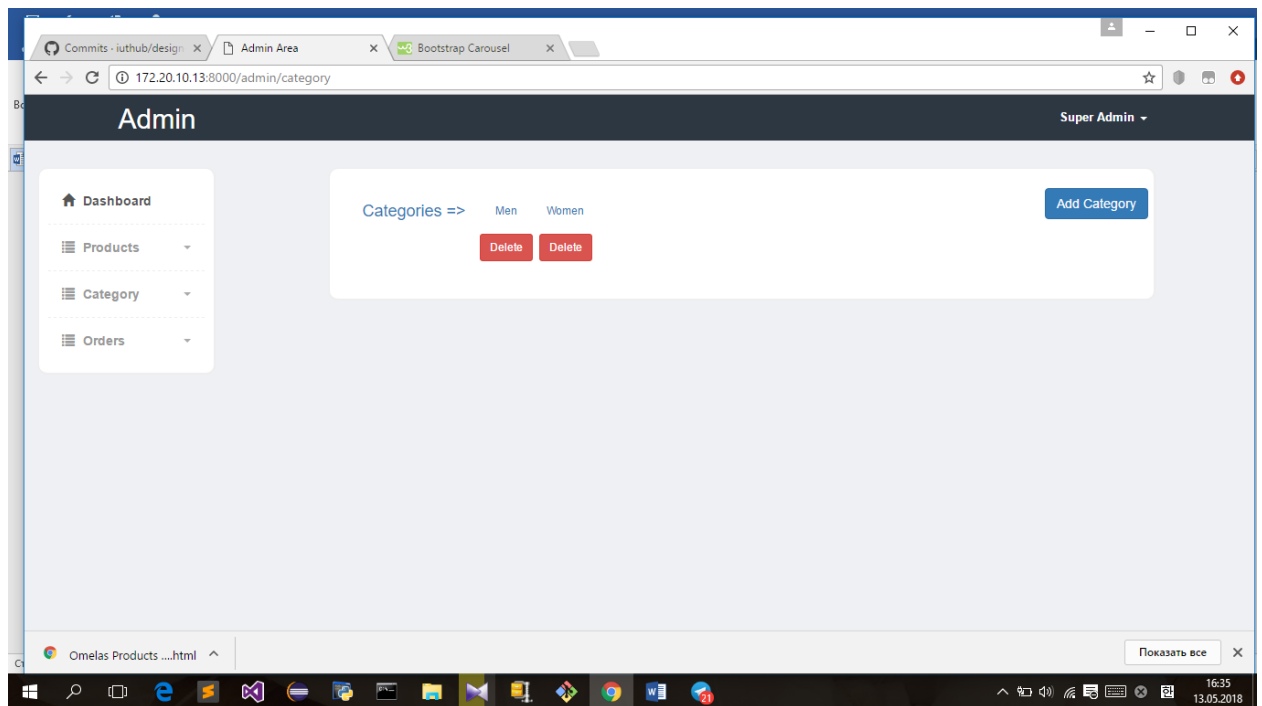

If you press the choose the file you can choose image of product:

Then if you enter products you can see this product:

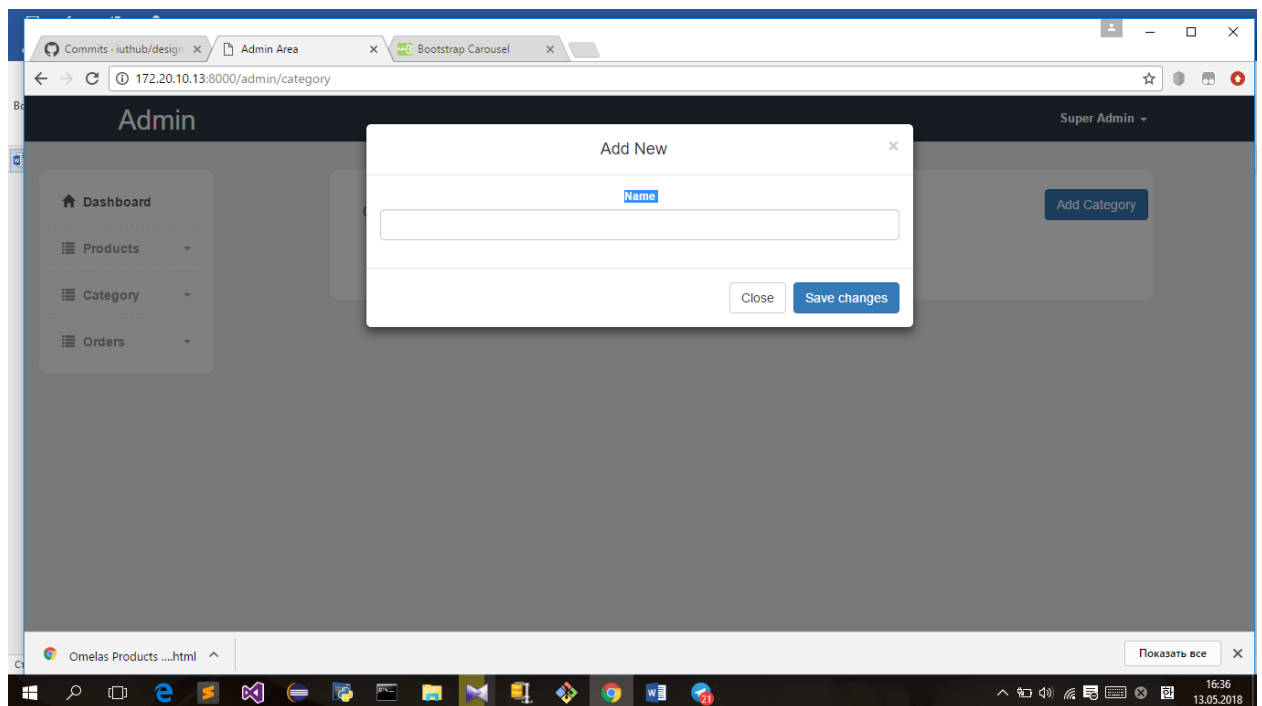

We can easily remove our products with delete button

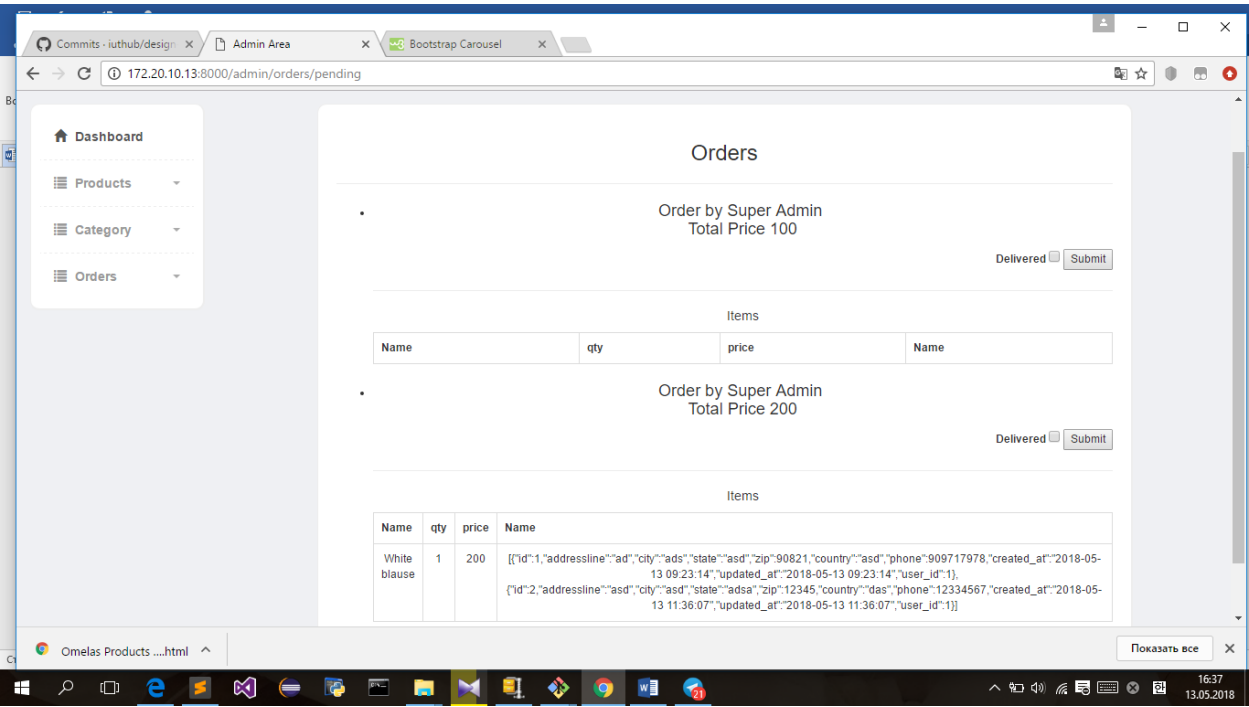

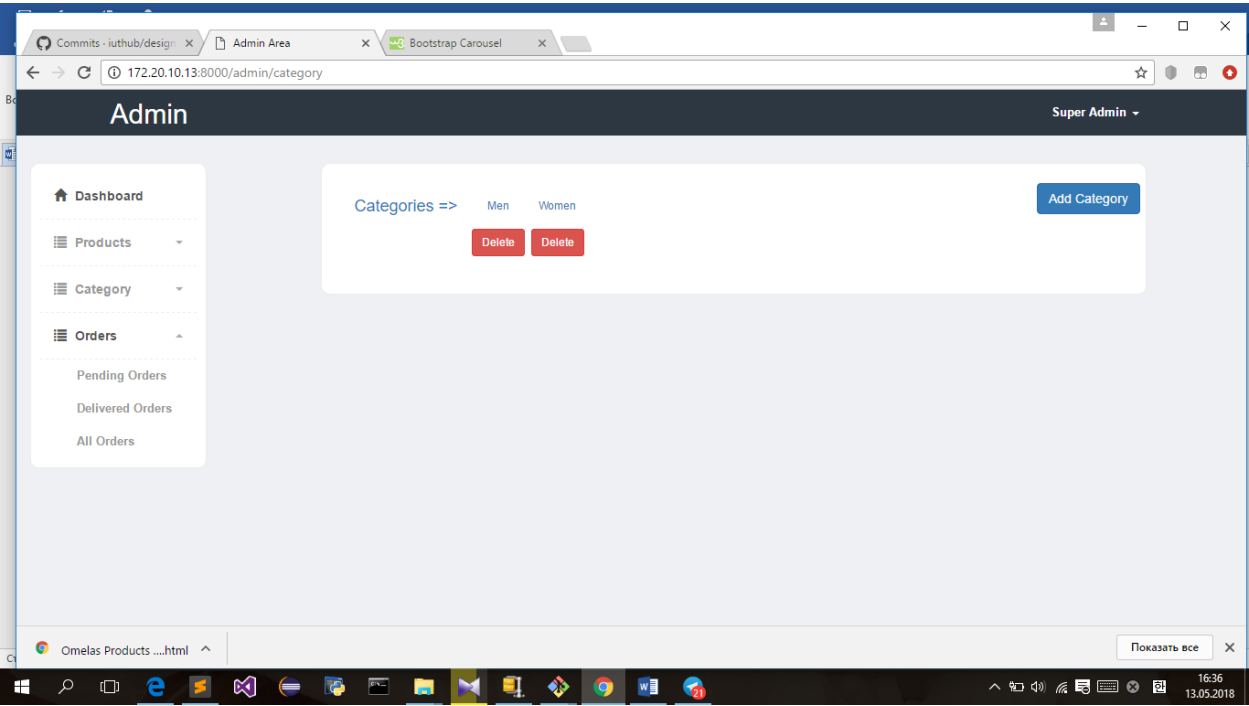

Also we have 2 categories initially: Men and Women

We can add category:

Admin can see orders done by Clients:

If you enter to our web-site you can see this index page.
